What is GAMMIS and why is it changing?

Let's do Amazing!

What is GAMMIS and why is it changing?

Georgia Medicaid Management Information System, known as the new GAMMIS, is the DCH browser-based, real time, online, management information system; scheduled for implementation in November, 2010.

Starting November 1, 2010, the new GAMMIS replaces the existing MMIS and significantly enhances the claims processing and related activities for DCH-managed programs, such as Managed Care Health Plans, PeachCare for Kids™, and others.

The new GAMMIS was constructed with the following priorities:

- Assumption of operations without disruption in services or payments.
- Assumption of operations by November, 2010.
- Maintaining and achieving federal MMIS certification.
- Compliance with all HIPAA requirements.
- Timely design and development of new components affecting providers (Web Portal, Web-based claims submission).
- Design and development of components that improve efficiency and convenience for State staff.
- Design and development of components that improve Contractor efficiency.
